

Brainport Eindhoven is a top technology region of international importance. By fostering an unprecedented level of cooperation between regional stakeholders from the public and private sector, the Dutch city of Eindhoven has successfully developed into a centre for knowledge-intensive industry. The area is part of a larger cooperation structure of three complementary ecosystems with a strong knowledge base and technological industry, known as the 'Eindhoven-Leuven-Aachen triangle' (ELAt).

### AIM

rejuvenate Eindhoven's reputation as technological stronghold  
&  
attract businesses and professionals  
↓  
'triple helix' partnership (local government, industry and knowledge industries)

### WHAT

provide free-of-charge services to new arrivals  
&  
confidential and personalised support  
&  
help understand local procedures

*The success of Brainport Eindhoven is based on cooperation between business life, public authorities and knowledge institutes. [...] Our regional economic strategy, 'Brainport 2020 - Top Economy, Smart Society' aims for a smart and sustainable economy, within an inclusive society. Its close alignment with the Europe 2020 strategy will prove to be a winning combination.*

*Elies Lemkes,  
Director of Strategy and Development, Brainport Development*

### LOOKING AHEAD

survive the crisis with minimum impact  
↓  
various programmes and projects  
e.g.  
promote interest in technology and creativity among young, attract financial support from stakeholders
